Sat, 16 Jun 2018 12:24:00 GMT - The term systems engineering can be traced back to Bell Telephone Laboratories in the 1940s. The need to identify and manipulate the properties of a system as a whole, which in complex engineering projects may greatly differ from the sum of the parts' properties, motivated various industries, especially those developing systems for the U.S. Military, to apply the discipline.

Sun, 17 Jun 2018 11:33:00 GMT - The 16 th Annual Conference on Systems Engineering Research (CSER 2018) invites authors to submit papers that address the practical and theoretical needs for systems in context research. No system operates independently of other systems and stakeholders. Understanding the interactions with other entities and the context in which a system will be used is paramount to the design process.
