Sat, 19 May 2018 20:07:00 GMT - In automotive design, an FR, or front-engine, rear-wheel-drive layout is one where the engine is located at the front of the vehicle and driven wheels are located at the rear. This was the traditional automobile layout for most of the 20th century. Modern designs commonly use the front-engine, front-wheel-drive layout (FF).

Front-engine, rear-wheel-drive layout - Wikipedia -

Sat, 19 May 2018 11:53:00 GMT - The first popular transverse engined FWD cars were the DKW 'Front' made from 1931, which had a twin cylinder two-stroke engine. Saab copied this design on their first car, the 1949 Saab 92. The Trabant in 1957 was also one of the only cars to have a transverse mounted engine, being a sort of DKW precursor. This was a novelty, especially for a car being made in a communist country.
