EFI Basics - pair Networks, Inc -

Thu, 17 May 2018 00:14:00 GMT - This is needed because the temp sensor on the EVO is located inside a cavity in the middle of the front rocker box cover, screwed directly into the top of the head. The twin cam temp sensor, by comparison, is located on the back of the front head, just above and beside the intake runner port. It is accessible by removing the horn.
