Sun, 10 Jun 2018 04:46:00 GMT - The paper explores post-modern currents in food security. It identifies three main shifts in thinking about food security since the World Food Conference of 1974: from the global and the national to the household and the individual; from a food first perspective to a livelihood perspective; and from objective indicators to subjective perception.

Thu, 14 Jun 2018 13:52:00 GMT - Malthusianism is the idea that population growth is potentially exponential while the growth of the food supply is linear. It derives from the political and economic thought of the Reverend Thomas Robert Malthus, as laid out in his 1798 writings, An Essay on the Principle of Population, Malthus believed there were two types of "checks" that in ...
