Fri, 15 Jun 2018 02:38:00 GMT - The platypus is one of the few living mammals to produce venom. Males have a pair of spurs on their hind limbs that secrete venom that is only seasonally active to breeding season, supporting the theory that the use of venom is for competition of mates only, not protection.

Mon, 18 Jun 2018 14:02:00 GMT - Toxicodendron radicans, commonly known as eastern poison ivy or poison ivy, is a poisonous Asian and Eastern North American flowering plant that is well-known for causing urushiol-induced contact dermatitis, an itchy, irritating, and sometimes painful rash in most people who touch it. It is caused by urushiol, a clear liquid compound in the plant's sap.
