Sun, 18 Mar 2018 17:17:00 GMT - Bone wax is a waxy substance used to help mechanically control bleeding from bone surfaces during surgical procedures.. It is generally made of beeswax with a softening agent such as paraffin or petroleum jelly and is smeared across the bleeding edge of the bone, blocking the holes and causing immediate bone hemostasis through a tamponade effect. Bone wax is most commonly supplied in sterile ...

Fri, 18 May 2018 02:50:00 GMT - A written language is the representation of a spoken or gestural language by means of a writing system. Written language is an invention in that it must be taught to children, who will pick up spoken language (oral or sign) by exposure even if they are not specifically taught.. A written language exists only as a complement to a specific spoken language, and no natural language is purely written.
